Qualification position. The True Troop does not currently award, accredit or examine the qualifications described. Accredited delivery and examinations would remain the responsibility of the appointed accredited provider under a written agreement.

THE OPPORTUNITY

A prepared audience seeking a credible next step

The True Troop has trained more than 460 project planners across 40+ cohorts. Its audience is built through practitioner-led Primavera P6 education, project-controls content and professional referrals.

460+	40+	12+ years
PROJECT PLANNERS TRAINED	COMPLETED COHORTS	PLANNING EXPERIENCE

What we are proposing

The True Troop recruits, screens and supports a closed cohort. The appointed provider supplies the accredited trainer, approved courseware, examinations and quality assurance. The parties test the model with a bounded first cohort, review the evidence and scale only where learner experience and commercial performance justify it.

Why it is commercially relevant

The provider is not being asked to fund an untested acquisition campaign. The True Troop brings a warm specialist audience, owns the recruitment effort and creates the practical context that precedes the professional qualification.

RESPONSIBILITIES

A clean division of work protects both brands

The model works only when provider status, learner data, marketing approval and delivery responsibility remain unambiguous.

THE TRUE TROOP BRINGS	THE ACCREDITED PROVIDER BRINGS
Established practitioner audience and campaign reach	Current accreditation for the agreed qualifications
Recruitment, enquiry handling and cohort administration	Approved trainer, courseware and quality assurance
Readiness diagnostics and practical context	Examination administration, registration and results
Pre-course communication and post-course support	Awarding-body compliance and provider oversight
Provider-approved marketing and cohort development	A repeatable delivery model and learner experience

Commercial principles

The initial discussion should establish a fixed closed-cohort fee, what is included, minimum and maximum class sizes, substitution and cancellation rules, data responsibilities, trainer approval and a practical timetable for marketing review.

PATHWAY AND EMPLOYER EVIDENCE

Practical preparation connected to recognised progression

LEARNER STAGE	PRACTICAL PREPARATION	PROVIDER-LED PATHWAY
Career starter	Primavera P6 Masterclass	APM PFQ, then PPC Foundation
Working planner	Primavera P6 Masterclass	PPC Foundation and Practitioner
Experienced planner	P6 and project-controls practice	PPC Practitioner and APM PMQ

Employer relevance

Recent UK role specifications show the relevance of these credentials: Rolls-Royce SMR listed APM PMQ as essential and APMG PPC Practitioner as desirable for a Senior Planner; VGC included APMG PPC Practitioner in a Lead Planner requirement; and a Civil Works Alliance role for Sizewell C identified PMQ or PPC Practitioner as desirable.

Examples checked 25 July 2026. Employers may amend or withdraw role listings. Public source links are retained on the partnership website.

Programme governance

Final qualification sequencing remains subject to the appointed provider's advice, current prerequisites, awarding-body requirements and each learner's experience. The provider must approve qualification marketing before launch.

PROPOSED STARTING POINT

A bounded first cohort and a direct decision

The first conversation is designed to establish fit before either organisation commits to campaign work or legal drafting.

PRIORITY PROGRAMME	APMG PPC Foundation and Practitioner
INITIAL FORMAT	Live virtual, closed cohort
PLANNING ASSUMPTION	12 learners, with a 6-16 operating range
PROVIDER RESPONSE	Accreditation, availability and indicative pricing for 12 and 16 learners

Requested next step

A 30-minute provider conversation covering current accreditation, delivery availability, indicative cohort pricing, marketing approval, learner data and the named trainer. If the fit is credible, the parties move to a concise term sheet and first-cohort schedule.
